

# Food Security for Communities

## Les Verts Terrace™ Pro

At Les Verts Living™, we empower anyone anywhere to grow fresh quality food for their family, friends and local communities.

Designed and built in Canada, our professional-grade indoor hydroponic garden systems make it easy for anyone to grow an abundance of high-quality produce all year long – even in the heart of our Canadian winters.

PLANT • NOURISH • THRIVE

**Les Verts Terrace™ Pro 3-Tier**  
Indoor Hydroponic Garden System

**Ideal for communities everywhere.**

**Remote & rural communities:** Grow affordable, high-quality produce year-round and reduce dependence on expensive, imported food.

**Northern communities:** Grow in any existing indoor space. No sunlight or special hook-ups required.

**Indigenous communities:** Grow a wide range of plants, herbs and vegetables to support food sovereignty, medicinal practices and cultural traditions.

 **MADE IN CANADA**

# Discover the benefits of indoor hydroponics with the Les Verts Terrace™ Pro

## 4S Benefits of Hydroponics

### Sustainability

No food waste, no food miles, no farmland. Ninety percent less water and 75% less fertilizer than conventional growing.

### Safety

Completely spray-free and far less risk of pathogens than store-bought produce.

### Security

Take control of your food supply and grow significant volumes for your community. Higher concentration of essential nutrients than field-grown produce.

### Stability

Reliable, affordable year-round production not impacted by climate change or weather-related events.

### What You Can Grow

- Herbs
- Lettuce
- Flowers
- Leafy Greens
- Tomatoes
- Peppers
- Microgreens
- ...and more!

### Garden Transplants

You can also use the system to start almost any type of plant for transplanting to your outdoor garden, saving money and time.

### Multi-Systems

Grow more with multiple units. Ask about our **volume discounts**.

"I really enjoyed having the Terrace Pro system in the 50 & over club. It was an easy-to-use system, and it was exciting to see the growth everyday. It created a conversation with the morning crew, they would check the growth and ask questions.

This system would be an asset in northern rural communities as well in local rural areas especially during the winter months. A school setting or Metis/treaty local would benefit from this system."

**Jennie Monkman, Community Resource Coordinator & Lifeline Manager**  
Roblin Services to Seniors Inc., Manitoba
